

CROSSVALE OPENSIFT LAUNCH PAD

- Crossvale technicians are Red Hat OpenShift Certified
- Your staff is better prepared with hands-on experience
- Leverage the OpenShift Platform to deploy multiple applications
- Take advantage of Crossvale's experience in multiple DevOps projects

ADOPTION OF RED HAT'S CONTAINER BASED PLATFORM MADE SIMPLER

We at Crossvale understand your challenge: Customers and Stake Holders have never been more demanding of value. They want it quickly, efficiently, securely, correctly and in a cost efficient manner.

The answer is OpenShift Enterprise by Red Hat, a container Platform as a Service (PaaS) that accelerates and streamlines application development and deployment.

However, we do understand that adoption of any PaaS can be both intimidating and complex.

Delivered by Certified Red Hat Consultants, the Crossvale OpenShift Launch Pad unleashes your PaaS initiative properly. Crossvale certified OpenShift consultants deliver hands-on guidance to your staff so that you may gain value quickly, efficiently, securely and correctly.

A MENTORED APPROACH TO DELIVERING VALUE

The Red Hat OpenShift platform is best of breed, but its value can only be realized with consistent Continuous Integration and Continuous Deployment (CI/CD) processes followed by your staff. To maximize your ROI, Crossvale's methodology is based on a Mentored Approach to Delivering Value.

OpenShift Introduction and Review

Before any work begins, your staff must all have the same OpenShift baseline information. Our one-day foundations class is delivered onsite or via WebEx, to ensure your staff understands:

- Terminology
- Architecture
- Functionality
- Security

Implementation of OpenShift Enterprise

Our experienced, certified consultants work alongside your staff to install and deploy the OpenShift base architecture:

- Crossvale will leverage a proven CI/CD methodology derived from multiple large projects, and work with your staff to deploy, scale and secure multiple applications on Red Hat OpenShift.

Mentoring and Hand-Off

- The terminology, architecture, functionality and security fundamentals delivered in the introduction phase are constantly reinforced to your staff during the Crossvale Launch Pad engagement.
- Crossvale provides a post-delivery series of documentation that describes the implementation. This is coupled with advice on the next phases of the initiative.

Post Hand-Off Support

- Crossvale provides post hand-off support by phone, WebEx or VPN to ensure fast delivery of value to your Customers and Stake Holders.

ABOUT RED HAT

Red Hat is the world's leading provider of open source software solutions, using a community-powered approach to reliable and high-performing cloud, Linux, middleware, storage, and virtualization technologies. Red Hat also offers award-winning support, training, and consulting services. As a connective hub in a global network of enterprises, partners, and open source communities, Red Hat helps create relevant, innovative technologies that liberate resources for growth and prepare customers for the future of IT.

The Crossvale Launch Pad engagement allows you to

- Enable your team for successful CI/CD delivery of code from concept to production.
- Migrate current applications to a container-based cloud.
- Spend less time working out the fine details and more time delivering business value to Customers and Stake Holders.
- Deliver value driven software repeatedly and frequently.
- Deliver code in public, private and hybrid clouds.
- Deliver scalable, secure solutions.
- Inherit proven processes for CI/CD.
- Map your path to future success with OpenShift.

THE CROSSVALE RED HAT CONSULTING PRACTICE DIFFERENTIATOR

Each Crossvale OpenShift Launch Pad Consultant has been certified by Red Hat as a qualified delivery practitioner. Moreover, every consultant has years of experience not only on Red Hat, but multiple other platforms making them fluent on multiple languages, architectures, messaging protocols, platforms and security practices. This expertise gained across multiple verticals makes them the perfect candidates to launch your PaaS initiative.
